

# Design Layout

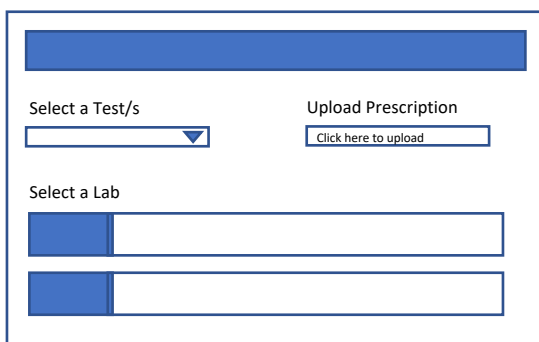

## Landing Page (User)

The landing page design layout consists of a blue header bar at the top. Below the header, on the left side, is a large blue square placeholder for an image. To the right of this square are five horizontal lines representing text content.

This page will give the customer information about the online diagnostic booking option, along with the features and advantages for the customer.

## New Booking Page (User)

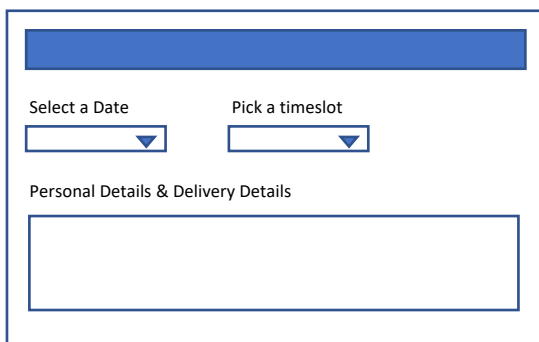

The new booking page design layout features a blue header bar. Below the header, there are two main sections. The first section contains a dropdown menu labeled 'Select a Test/s' and a button labeled 'Upload Prescription' with a sub-label 'Click here to upload'. The second section contains a dropdown menu labeled 'Select a Lab' and two input fields for lab selection.

This page will allow the customer to make a booking for a diagnostic test, for sample collection at home. The design on the left is an indication and can be changed as per preference.

The user should be able to search for tests of their choice.

The user should also be able to upload their prescription on this page.

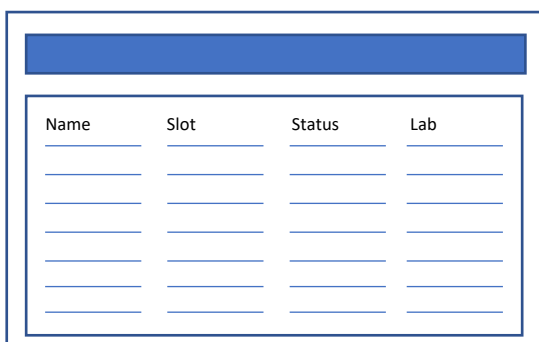

## Booking details (User)

The booking details page design layout features a blue header bar. Below the header, there are two dropdown menus labeled 'Select a Date' and 'Pick a timeslot'. Below these menus is a section labeled 'Personal Details & Delivery Details' with a large input field for user details.

This page will collect all the important details of the customer as well as the booking in terms of date, time, address etc

## Booking List (Admin)

The booking list page design layout features a blue header bar. Below the header is a table with four columns: Name, Slot, Status, and Lab. The table contains several rows of data, represented by horizontal lines.

Name	Slot	Status	Lab

This page will outline all the bookings made by customers on the admin side. The fields provided in the design are indicative, you will have to add additional fields as required on this page.
